NGUYỄN PHÚC THỊNH

Software Engineer
6 year experience

Main skills

React JS (React hook, React Component)

C#, .NET Core , .Net Framwork

SQL Server

HTML - CSS

Azure portal service

Using AI To Support And Accelerate Work Tasks.

Power BI

Team work

Objective Education

To be able to work for an encouragingand stable company that will assistme in
 developing,Improving, and obtaining thenecessary skills in order to

👥 Work experience

.NET ENGINEER
03/2022 – Present

Step Media

Role:
- Implemented new features based on requirements and resolved bugs during development
- Maintained and regularly refactored source code to keep it clean, scalable, and compliant with coding conventions.
- Optimized UI and API performance to reduce response time and enhance user experience.
- Monitored logs and investigated issues in the staging environment, collaborating with QA to validate and resolve problems before production release.
- Participated in code reviews to ensure consistent code quality across the team.
- Worked closely with cross-functional teams, including BAs, testers, and backend developers, to implement features effectively.
